

8410 LH

Fall Dormancy: 4

Hybrid Highlights

- High resistance to potato leafhoppers
- Great choice where leafhoppers are a significant pest
- Very winter-hardy variety with strong persistence
- Strong overall disease resistance
- Excellent choice for variable soils due to strong root rot resistance, including multi-race Aphanomyces resistance

Always follow grain marketing and IRM requirements and pesticide label directions. Agronomic characteristics and ratings may vary with growing conditions and environment. Ratings are approximate and should not be considered as absolute. Ratings on new products are based on limited data and may change as more data are collected. Extreme or variable conditions may adversely affect performance.
